**REMARKS/ARGUMENTS**

Claims 47-88 remain pending in this application. Claims 1-46 have been canceled without prejudice or disclaimer. New claims 55-88 have been added.

**Specification and Drawings**

Upon review of the specification and drawings, Applicants have noticed that the addition of missing reference numerals and correction of typographical errors were needed. Therefore, a Substitute Specification has been submitted with this paper that incorporates these changes, and that also incorporates the changes made by the Amendment filed November 1, 2005. Nine replacement drawing sheets have been submitted with this Amendment. No new matter has been added.

**Interview and Discussion of New Claims**

Applicants wish to thank the Examiner for conducting an interview with the undersigned and Applicants' representatives. As set forth in the Interview Summary, proposed new independent claims 55 and 66 overcome the prior art of record. Due to the addition of some claims dependent upon claim 55, proposed independent claim 66 has been renumbered as claim 71. New independent claims 55 and 71 submitted with this amendment are identical to claims 55 and 66 proposed during the

interview. Since claims 47-54 have already been allowed, the application is in condition for allowance.

During the interview, the arguments filed with an RCE dated March 1, 2006, were also presented. Those arguments are hereby incorporated by reference. It is submitted that the previously rejected claims were patentable over the art of record and that the present claims merely clarify some features as discussed during the interview.

**Conclusion**

In view of the foregoing, Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

Respectfully submitted,
